

PB&J Strategic Accounting

Strategic accounting for growing businesses

Your First Sign-In

A step-by-step guide

Prepared for **Brittany Ferguson**

Optimized for iPhone · iOS 17 or later

Before you start

You'll need three things in front of you:

- Your laptop or computer.
- Your iPhone, unlocked and within reach.
- Access to your email at `bferguson@pbjsa.com` .

About your iPhone

Your iPhone has a free authenticator built right in — no app to download. It's called the **Passwords** app. You'll find it on your home screen (iOS 18+) or under *Settings* → *Passwords* (iOS 17).

TIP

If you can't find the Passwords app, open **Settings**, scroll to **Passwords**. Same thing.

Sign in

- 1 On your laptop, open this URL:
<https://pbjbillingapp-production.up.railway.app/owner>

BOOKMARK IT

This is your **owner** sign-in page. Your team uses a different URL and never sees this one.

- 2 In the **Email** field, type `bferguson@pbjsa.com` .

- 3 Click **Send me a sign-in link**.

You'll see a confirmation: "Check your inbox for a sign-in link."

Open the email

- 1 Open your inbox at `bferguson@pbjsa.com`.
- 2 Find the email from `signin@ka-testing.com`. Subject: "*Sign in to PB&J Strategic Accounting.*"
- 3 Click the sign-in link inside the email.

HEADS UP

The link expires in 15 minutes and only works once. If you miss it, just request a new one from the sign-in page.

DON'T SEE THE EMAIL?

Check spam. First emails from a brand-new sending address sometimes land there. Mark it **Not spam** so future ones come through cleanly.

Set up two-factor authentication

Owners are required to use two-factor authentication. This is a **one-time setup** that takes about 30 seconds. After today, every sign-in is a 10-second routine.

You'll land on a page titled "*Set up two-factor authentication.*" Pick whichever option below matches your setup.

EASIEST

You opened the email on your iPhone

If you're reading the setup page on your iPhone right now:

- a. Tap the big purple button: **Open in my authenticator app.**
- b. Your iPhone pops up: "*Save verification code for PB&J Strategic Accounting?*" Tap **Save in Passwords.**
- c. You'll bounce back to the browser. Tap **I added it — next.**

MOST COMMON

You're on your laptop, phone in hand

- a. On your iPhone, open the regular **Camera** app.
- b. Point it at the QR code on the laptop screen (don't snap a photo — just hover).
- c. A yellow banner appears: **Open in Passwords.** Tap it.
- d. iPhone Passwords opens and asks to save the verification code. Tap **Save.**
- e. Back on your laptop, click **I added it — next.**

IF NEITHER WORKS

Type the setup code manually

Below the QR code, click "*Still stuck? Type the setup code instead.*" You'll see a long code like
JBSWY3DPEHPK3PXP...

- a. On your iPhone, open **Settings** → **Passwords** and tap the + at the top.
- b. Choose **Set Up Verification Code** → **Enter Setup Key**.
- c. Account name: *PB&J Strategic Accounting*. Setup key: paste the long code from your laptop.
- d. Tap **Done**, then on your laptop click **I added it — next**.

Verify your first code

Now we make sure it actually works.

- 1 Open the iPhone **Passwords** app and find the new entry: *PB&J Strategic Accounting*.
- 2 You'll see a 6-digit code that changes every 30 seconds. Tap and hold to copy it.
- 3 On your laptop, type that code into the **6-digit code** field.
- 4 Click **Verify and continue**.

IF IT GETS REJECTED

The code is probably about to refresh. Wait for the next 30-second cycle and try the new code.

Save your backup codes

You'll see a screen with 8 backup codes that look like `XXXX-XXXX-XX`.

IMPORTANT

These are your safety net. If you ever lose your iPhone, you use one of these to sign in. **Save them** before you click anything else on this screen.

What to do with them

- 1 Click **Download as text**. A small file with all 8 codes saves to your computer.
- 2 Put that file somewhere you'll find it later. Good options:
 - Inside a password manager (1Password, Apple Passwords notes).
 - Inside a locked note in iPhone Notes.
 - Printed and kept in a locked drawer.
- 3 When saved, click **I've saved my codes**.

The rules

- Each code works only **once**. Burn after use.
- Don't share them. Treat them like spare house keys.
- Don't email them to yourself or paste into a shared doc.

ALL SET

You're in

Welcome to your dashboard.

From now on, every sign-in is three steps

- 1 Visit <https://pbjbillingapp-production.up.railway.app/owner>
- 2 Enter your email → click the link in your inbox.
- 3 Type the 6-digit code from your iPhone Passwords app.

After that, you have a **30-day session** on that device — you won't have to repeat this on the same browser for a month.

Get familiar

A few minutes per section is enough to feel oriented.

1. Settings — make it yours

Click **Settings** in the sidebar (bottom-left).

- Firm name, tagline, address, phone, EIN — these appear on invoices.
- Logo URL — paste a public image URL for your logo.
- Brand color — pick a color; it drives the sidebar accent.

All fields save automatically when you click away. Look for the small "Saved" indicator.

2. Team — invite your bookkeepers

Click **Team** in the sidebar.

- Click **Invite bookkeeper** and enter name, email, role.
- The bookkeeper receives a sign-in email directly. No URLs to copy and paste.
- They click their email link → they're in. They can optionally set up two-factor (not forced).

3. Clients

Click **Clients**. The demo client *Clover Ridge Dental* is pre-loaded — click the name to open its profile.

- Contact info, branding, invoice settings.
- QuickBooks "Pay Now" link — paste your URL from QuickBooks; appears as a button on invoices.
- Assigned team — controls which bookkeepers can see this client.

4. Tasks

Click **Tasks**.

- + **New** → **One-time task** or **Repeating task**.
- Repeating tasks generate automatically on the schedule you pick.
- + **Add a hand-off step** inside the form turns a task into a multi-person workflow — when one person finishes their step, the next person's task appears automatically.

5. Dashboard

Click **Dashboard**. At-a-glance view:

- Alert cards — overdue, due this week, stuck cases.
- Your queue — your own tasks for today / this week / later.
- Team — every bookkeeper at a glance.
- Recent activity — what the team has been doing.

Troubleshooting

Didn't get the sign-in email

- Check your spam folder first.
- Wait 30 seconds — sometimes there's a brief delay.
- Still nothing after 5 minutes? Ask Alex to check the email service.

The 6-digit code is rejected

- Your iPhone's clock might be a few seconds off. Codes rotate every 30 seconds.
- Wait for the next refresh and try the new code.
- Still failing? Ask Alex to reset your two-factor — you'll start setup over.

You lost your iPhone

- Use one of your 8 backup codes to sign in instead of a 6-digit code.
- Once you're in, regenerate your codes from **Settings** → **Security** and set up two-factor on the new device.

Out of backup codes

- Ask Alex to reset your two-factor from his Team page. You'll go through setup again.

TEAR-OFF CARD

Quick reference

Print this page and tape it to your monitor.

Sign in to PB&J Strategic Accounting

<https://pbjbillingapp-production.up.railway.app/owner>

Every sign-in:

1. Enter your email
2. Click the link in your inbox
3. Type the 6-digit code from iPhone Passwords

Lost phone? Use a backup code from your saved list. Out of codes? Contact Alex.
